

The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections. Indiana's law has improved my time at home but more importantly my Mother's. My Mother is 81 years old and she used to get calls daily from unsolicited telemarketers. Indiana's law has been extremely effective in eliminating these unwanted invasions of privacy.

Why does the FCC want to fix something that is not broken. Indiana took the initiative in fixing the problem. I believe it is an extremely successful law. PLEASE DO NOT PASS 02-278.
